Proposed Conditional Use Permit: Accessory Structure

Review

The applicant is seeking Conditional Use Permit approval, for the following:

- Section 18-40(d)(2) for "other uses accessory to the principal use..." – specifically, an accessory storage structure.
- Section 18-40(n) for "density, intensity and bulk regulations within the Abbey Harbor Marina Subdistrict may not exceed existing conditions except by granting of a conditional use permit."
- Section 18-162 for Exemptions to Design Standards: "The conditional use process may be used to seek exemptions from the requirements of this article [Article X]."

Section 18-40(j) requires "All additional development shall comply with applicable design standards of article X" – which, as required in Section 18-163, the Plan Commission is responsible for acting on.

REQUEST OF AN ACCESSORY USE TO THE PRINCIPAL USE and INCREASE IN DENSITY, INTENSITY AND BULK:

According to the submitted application, the accessory structure is proposed to be located near an existing dumpster enclosure (which will be reduced in size and a portion thereof relocated on the site) and will eliminate four (4) existing parking spaces. The proposed location is adjacent to and visible from Fontana Boulevard.

The proposed structure will be 24'x30' and 20'6" as measured to the peak of the roof. (* Fontana Municipal Code measures building height from lowest existing grade adjacent to the foundation, to the midpoint of the tallest gable on a pitched shed or hip roof.) There are no stated bulk regulations in the Abbey Harbor Marina Subdistrict to regulate maximum size or height.

The proposed exterior will be a plywood made to replicate vertical cedar siding to match the existing principal structure (Harbor House).

The proposed structure will include two floors, accessible via an interior stairway.

REQUEST OF DESIGN STANDARD EXEMPTIONS:

Article X: Design Standards.

Section 18-162: Exemptions. "The conditional use process may be used to seek exemptions from the requirements of this article."

The following exemptions are requested through the Conditional Use process:

- Sec. 18-164(c)(1)(b): A minimum of 30 percent window coverage on the first floor (of the façade facing a public street).
- Sec. 18-164(c)(1)(c): A minimum of 15 percent window coverage on upper stories (of the façade facing a public street).
- Sec. 18-164(e)(2)(g): The use of plywood (on the façade facing a public street).

Recommendation

Professional Staff recommends the following:

- Approval of a CUP to allow for an "other use accessory to the principal use." [Sec. 18-40(d)(2)]
- Approval of a CUP to allow for exceeding existing density, intensity and bulk regulations within the Abbey Harbor Marina Subdistrict. [Sec. 18-40(n)]

- Approval of a CUP to allow for the following requested exemptions of Article X, Design Standards. [Sec. 18-162]
 - Less than 30 percent window coverage on the first floor of the façade facing a public street. [Sec. 18-164(c)(1)(b)]
 - Less than 15 percent window coverage on upper stories of the façade facing a public street. [Sec. 18-164(c)(1)(c)]
 - The use of plywood on the façade facing a public street. [Sec. 18-164(e)(2)(g)]
- The structure shall not exceed 24'x30' in size.
- The structure shall not exceed 20'6" in height as measured from the lowest existing grade to the highest peak of the roof.
- The exterior of the structure shall be of materials made to match the principal building (Harbor House).
- All dumpsters, whether remaining adjacent to the structure or relocated on the site, shall be fully screened with materials matching the principal building (Harbor House).
- All Building, electric & zoning permits shall be completed, submitted, and paid for in full within ten (10) days of the date of this approval.
- All outstanding cost recovery fees billed to date applicable to this project shall be paid prior to the issuance of any building & zoning permits. This condition does not alleviate the applicant from any cost recovery fees not yet billed.
- An as-built survey shall be required depicting the location and height of the completed structure.
