### May 8, 2020 Project Update

#### South Lake Shore Drive Reconstruction

#### Village of Fontana-on-Geneva Lake

Storm sewer work is continuing in S Lake Shore Drive east of Shabbona Drive. At times Shabbona Drive will not be passible due to the size and depth of the storm sewer being installed. The storm sewer trench from Shabbona Drive to the top of the hill west of Walworth Avenue is scheduled to be paved next week Tuesday.

New water main has been installed in S Lake Shore Drive between Walworth Avenue and Brickley Drive, and within Brickley Drive. We anticipate some localized water shutdowns on Monday and Tuesday of next week when the new water main is connected to existing mains at side streets. The Contractor has also begun to switch individual water services from the old mains to the new. During this time Property Owners may experience times without water. The Village and its contractors will do everything possible to limit these disruptions and notify homeowners the evening before the occurrence. Water may appear cloudy for a short period of time after water service is restored. Allow water to run through a tub faucet or garden house until the water appears clear. Whenever possible, discharge this initial volume of water from a faucet BEFORE any filters or water softeners. Sanitary sewer rehabilitation work is also continuing throughout the project limits and may require temporary lane closures.

S Lake Shore Drive between Shabbona Drive and Indian Hills Road as well as Brickley Drive will remain closed to through traffic during this phase of construction. Please follow all detours and construction signage. Residents should anticipate the Contractor working most Saturdays prior to Memorial Day weekend.

We Energies is continuing to relay (replace) the existing gas main along S Lake Shore Drive east of Indian Hills Road. The gas line relay work is not a Village project. Other private utilities may be onsite during the project including electric, cable or telephone, however those utilities are not proposing any changes except for minor adjustments to relocate conflicting poles or lines.

Feel free to contact the Village at (262) 275-6136 with any questions.
