VILLAGE BOARD OF THE VILLAGE OF FONTANA-ON-GENEVA LAKE

June 2, 2008

Resolution No. 06-02-08-03

A Compliance Maintenance resolution required by the Wisconsin Department of Natural Resources

WHEREAS, it is a requirement under the Wisconsin Pollutant Discharge Elimination System (WPDES) permit, issued to the Village of Fontana by the Wisconsin Department of Natural Resources, to file an Compliance Maintenance Annual Report (CMAR) for its wastewater collection system) under Wisconsin Administrative Code NR 208;

WHEREAS, it is necessary to acknowledge that the governing body has reviewed the Compliance Maintenance Annual Report (CMAR);

WHEREAS, it is necessary to provide recommendations or an action response plan for all individual CMAR section grades (of "C" or less) and/or an overall grade point average (< 3.00);

BE IT THEREFORE RESOLVED by the Board of Trustees for the Village of Fontana that there are no actions necessary, nor are there any deficiencies with wastewater collection system identified in the Compliance Maintenance Annual Report (CMAR)

Adopted this 2nd Day of June, 2008

President

Clerk

Facility Name: Fontana On Geneva Lake Village

Trans.		Questions	Points	
1.	Do you have a Capacity, Management, Operation & Maintenance(CMOM) requirement in your WPDES permit?			
2 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	0	Yes No		
2.	Did you have a collection syste	documented (written records/files, computer files, video tapes, etc.) sanitary sewer m operation & maintenance or CMOM program last calendar year?	0	
	0	Yes (go to question 3) No (30 points) (go to question 4)		
3.	Check the elem CMOM program	ents listed below that are included in your Operation and Maintenance (O&M) or n.:		
		Goals: specific identification of major goals of your O&M/CMOM program such as I/I reduction, basement backup and SSO reductions, repair and rehabilitation of sewers, system cleaning and monitoring, etc.		
		Organization: identification of those managers and persons who are responsible for implementing your O&M/CMOM program and reporting sanitary sewer overflows		
		Legal Authority: sufficient authority, through sewer use ordinances, service agreements or other legally binding documents to control infiltration/inflow sources, proper design, construction, inspection and testing of new and rehabilitated sewers and laterals and address flows from satellite collection systems, if present.		
		Maintenance Activities: routine preventative O&M activities, including adequate maintenance of facilities and equipment. By the use of: sewer system monitoring; inspections; a system to identify infiltration/inflow sources (including private property); a system for replacement part inventories; control of fat, oil & grease; employee training program; and a management system for the collection and use of information to establish O&M priorities		
		Design and Performance Standards: establish requirements and standards for design, installation and inspection of new sewers, service laterals, pump stations and sewer rehabilitation projects.		
		Overflow Emergency Response Plan: documented procedures for responding to SSOs, power outages, lift station failures sewer blockages or any other similar events of an emergency nature.		
		Capacity Assurance: a program to assess the current capacity of the collection system to identify problems or bottlenecks; and if required, a System Evaluation		
		and Capacity Assurance Plan (SECAP). Annual Self-Auditing of your O&M/CMOM Program to ensure above components are being implemented, evaluated, and re-prioritized as needed.		
		Special Studies (if applicable): any special studies undertaken such as I/I Analysis, Sewer System Evaluation Surveys (SSES), or sewer pipe studies. Please list the study reports of the last year below:
